pediatric trauma continues to have a significant impact on the health and well being of children in the united states trauma continues to be the leading cause of death in children 1 to 18 years of age and accounted for more than 14 000 deaths among all children 0 to 18 years of age in 2008 there were more than 8 6 million nonfatal injuries among newborn to 18 year olds with an injury rate of greater than 1 in 10 there is little debate that a coordinated effort and pediatric specific advances in pediatric trauma systems prehospital care and hospital care and injury prevention can have a positive impact on pediatric trauma outcomes in the united states however there are still gaps in access to centers that deliver pediatric focused trauma care especially in rural areas furthermore there are differing views between different centers regarding the optimal approach to the initial evaluation and management of the pediatric trauma patient this book is targeted to review critical aspects of the care of the pediatric trauma patient

highlighting the most common and critical injuries encountered in the acute care setting

geriatric medicine has emerged as a crucial field since its inception in the mid twentieth century by marjory warren in england this area of healthcare focuses on the unique needs of the aging population which is rapidly increasing worldwide while some countries have developed comprehensive geriatric care systems including specialized medical professionals community services and palliative care others are still grappling with the challenges of providing adequate services for their elderly citizens the disparity in geriatric care across different nations highlights the need for a global exchange of knowledge and strategies recent studies have shown that countries with well established geriatric care systems can serve as models for those still developing their services however there remains a significant gap in understanding how these successful frameworks can be adapted and implemented in diverse cultural and economic contexts addressing this gap is essential for ensuring that all aging populations receive the care and support they need this research topic aims to explore and document the diverse structures and developments of geriatric care across different countries by examining the aging demographics availability of specialized healthcare professionals and existing services this research seeks to identify best practices and innovative strategies that can be shared globally the objective is to foster a collaborative environment where countries can learn from each other s experiences ultimately leading to improved geriatric care worldwide key questions include how countries with less developed systems can enhance their geriatric care and what role international collaboration can play in this process to gather further insights into the global landscape of geriatric care we welcome original research review mini review case report clinical trial and opinion articles addressing but not limited to the following themes the country specific aging structure of the population an overview of professional and academic healthcare providers structure of healthcare services for the older patient country specific challenges and future planning and developments examples of countries with well established geriatric care systems which served as models for countries still developing their services by sharing research and insights we aim to build a comprehensive body of work that significantly advances progress in geriatric care ensuring that all elderly individuals receive the support and services they deserve
