this book demonstrates through methodological reflections and carefully chosen case studies a new way to conduct study of religion it focuses on how social actors negotiate what counts as religion and how discourses on religion are part of the way in which contemporary societies organise themselves the present volume draws on examples from judicial processes media discourses and scholarly debates related to wiccans druids and jedi knights among others by analysing discourses on religion and building on rather than rejecting genealogical critiques of religion teemu taira argues that the study of religion can be constructive and socially relevant

the wars of religion embroiled france in decades of faction violence and peacemaking in the late sixteenth century when historians interpret these events they inevitably depend on sources of information gathered by contemporaries none more valuable than the diaries and collection of pierre de l estoile 1546 1611 who lived through the civil wars in paris and shaped how they have been remembered ever since taking him out of the footnotes and demonstrating his significance in the culture of the late renaissance this is the first life of l estoile in any language it examines how he negotiated and commemorated the conflicts that divided france as he assembled an extraordinary collection of the relics of the troubles a collection that he called the storehouse of my curiosities the story of his life and times is the history of the civil wars in the making focusing on a crucial individual for understanding reformation europe this study challenges historians assumptions about the widespread impact of confessional conflict in the sixteenth century l estoile s prudent non confessional responses to the events he lived through and recorded were common among his milieu of gallican catholics his life writing and engagement with contemporary news books and pictures reveals how individuals used different genres and media to destabilize rather than fix confessional identities bringing together the great variety of topics in society and culture that attracted l estoile s curiosity this volume rethinks his world in the wars of religion

this collection addresses as it exemplifies an identity crisis in contemporary philosophy of religion it represents a unique two way dialogue between philosophers of religion and scholars of religion and broaches issues pertaining to the philosophy of religion and the philosophical tradition on the one hand and religious studies theology and the modern academy on the other while each author manages the current challenges in philosophy of religion differently one can nonetheless discern a polyphony of interests surrounding a postcritical postsecular appreciation of religion in part 1 contributors ask how philosophy of religion can accommodate both the strengths and weaknesses of western analytic and continental traditions incorporate developments in ideology critique gender studies and asian philosophies and negotiate the perceived stalemate in philosophy of religion part 2 addresses these questions in terms of a philosophy of religion that is postcolonial in intention and multidisciplinary in orientation and features scholarship from the fields of both religion and theology an underlying theme is the importance of ushering philosophy of religion into a postphenomenological era of religious studies and theology this is a neglected dimension in many laudable discussions about philosophy of religion that this volume hopes to emend

highlights the underexplored connection between new wave american science fiction and asian religions such as taoism buddhism and hinduism

the present volume as its title imports relates a complicated series of conflicts of which the origin or the pretext has for the most part to be sought in the great religious schism of christianity but the cause of the restoration of catholic unity in the west was in the minds of both the supporters and the opponents of that cause inextricably interwoven with the purposes of dynastic ambition and powerfully affected by influences traceable to the rapid advance of the monarchical principle and to the gradual growth of the conception of the modern national state although in graver peril

than ever before from the persistent advance of the ottoman power europe no longer finds a real unifying force in either papacy or empire the spiritual ardor of the catholic reaction which might have served to strengthen the resistance to the general enemy of christendom is expended largely on internecine conflicts it allies itself with the settled resolution of philip of spain to control the destinies of western europe and thus there is not a phase of the religious and political struggle here described which remains unconnected with the rest the religious wars of france with an account of which this volume opens furnish the most complete instance of the constant intersection of native and foreign influences but it is illustrated by almost every portion of the narrative since therefore the story of no european country or group of countries in this troubled period admits of being told as detached from the contemporary history of its neighbors allies or adversaries the same series of events must necessarily appear more than once in these pages as forming an organic part of the history of several countries but treated in each case from a distinct point of view

the thirteen essays in this volume offer a challenge to conventional scholarly approaches to the sociology of religion they urge readers to look beyond congregational settings beyond the united states and to religions other than christianity and encourage critical engagement with religion s complex social consequences by expanding conceptual categories the essays reveal how aspects of the religious have always been part of allegedly non religious spaces and show how by attending to these intellectual blindspots we can understand aspects of identity modernity and institutional life that have long been obscured religion on the edge addresses a number of critical questions what is revealed about the self pluralism or modernity when we look outside the u s or outside christian settings what do we learn about how and where the religious is actually at work and what its role is when we unpack the assumptions about it embedded in the categories we use religion on the edge offers groundbreaking new methodologies and models bringing to light conceptual lacunae re centering what is unsettled by their use and inviting a significant reordering of long accepted political and economic hierarchies the book shows how social scientists across the disciplines can engage with the sociology of religion by challenging many of its long standing empirical and analytic tendencies the contributors to this volume show how their work informs and is informed by debates in other fields and the analytical purchase gained by bringing these many conversations together religion on the edge will be a crucial resource for any scholar seeking to understand our post modern post secular world

this volume presents a selection of essays by the late philip quinn one of the world s leading philosophers of religion quinn left behind an influential body of work on a wide variety of topics he was the author of divine commands and moral requirements 1978 and of more than two hundred papers in philosophy fourteen of his best and most influential contributions to the philosophy of religion are gathered here the papers have been organized around the following topics religious epistemology religious ethics religion and tragic dilemmas religion and political liberalism topics in christian philosophy and religious diversity

rhetorics of religion in american fiction considers the way in which contemporary american authors address the subject of belief in the post 9 11 age of terror naydan

suggests that after 9 11 fiction by mohsin hamid laila halaby philip roth don delillo john updike and barbara kingsolver dramatizes and works to resolve impasses that exist between believers of different kinds at the extremes these impasses emerge out of the religious paradox that shapes america as simultaneously theocratic and secular and they exist for instance between liberals and fundamentalists between liberals and certain evangelicals between fundamentalists and artists and between fundamentalists of different varieties ultimately naydan argues that these authors function as literary theologians of sorts and forge a relevant space beyond or between extremes they fashion faith or lack thereof as hybridized and hence as a negotiation among secularism atheism faith fundamentalism and fanaticism in so doing they invite their readers into contemplations of religious difference and new ways of memorializing 9 11

the last day of june 1559 was a gala day in paris the marriages of philip ii of spain with elizabeth of france daughter of king henry ii and catherine de medici and that of the french king s sister marguerite with emanuel philibert duke of savoy were to be celebrated but the torches of joy became funeral tapers before nightfall for henry ii was mortally wounded in the tournament given in honor of the occasion
