fingering table is expanded with aural criteria passages of pieces could be transcribed to other instruments and be reviewed on their playability when a sound situation requires this this is a crude tool and should be extended to acoustically physical and aesthetic parameters to make further developments of the clarinets vienna clarinet and french clarinet the aim of further development of wind instruments should be optimizing and expanding sound and fingering techniques appearances advantages of the fingering of each clarinet system should be usable on other instruments and apart from the bore of the systems universal
